

INDUSTRY:

Electronics & Electricals

GEOGRAPHIC REACH:

North America

FOCUS PRODUCT/SERVICE:

Copper tubes, Polymeric tubes & fittings

FOCUS APPLICATION:

HVAC applications in residential and commercial buildings

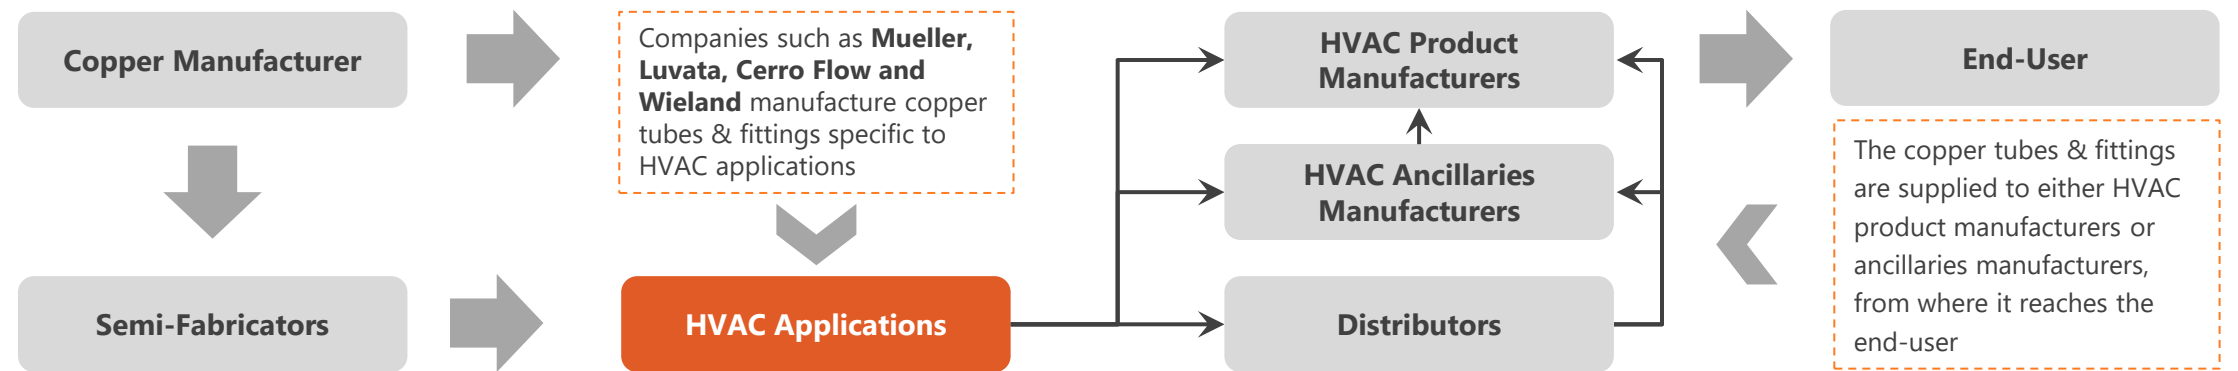

TIMELINES:

9 to 10 weeks

PROJECT OBJECTIVE:

Assess the opportunity provided by polymeric alternatives to copper tubes in HVAC applications for buildings within the North American market along with understanding the market size of fittings for copper tubes

VALUE CHAIN – COPPER TUBES & FITTINGS:

KEY QUESTIONS ANSWERED:

- Market overview of copper tubes used in HVAC applications
- Current market size of fittings for copper tubes in HVAC applications (clamps, connectors, etc.)
- Replacement rate of copper tubes by polymeric tubes
- Future outlook for polymeric tubes in HVAC applications for buildings
- Potential opportunity for fittings used for copper and polymeric tubes
- Analysis of the copper tubes and polymeric tubes manufacturers
