

INDUSTRY:

Industrials

GEOGRAPHIC REACH:

China

FOCUS PRODUCT/SERVICE:

Industrial Filters

FOCUS SEGMENT:

Mining (dewatering process for non-energy resources)

PROJECT OBJECTIVE:

- Assessing the market for industrial filters used in the mining industry in China, through an in-depth understanding of the market structure and shares, and a detailed assessment of the key players in the industry
- Assess the market potential of industrial filters used in mining in China, market segmentation, major drivers and challenges, and regulatory framework governing the metals & mining industry in China and its impact on the focus market

KEY QUESTIONS ANSWERED:

- Understand the market structure and identify the key players and suppliers of industrial filters used in the mining industry in China
- Detailed assessment of the selected five major players in the focus market
- Understand the market for industrial filters used in mining industry in China and assess the current and future scenario
- Analyze the regional differences, trends and other factors impacting the market for industrial filters used in mining
- Assess the regulatory framework affecting the market for industrial filters used in mining industry – covering policies, industry standards, among others
